

30-Day Agentic AI Workshop Plan (Open Source)

Day	Topic	Learning Objective/Project	Open Source Resource
1	Intro to Generative AI	Understand what generative AI and LLMs are	Hugging Face Course
2	LLM Applications	Explore LLMs in action	Transformers Quick Start
3	No-Code AI Agents	Build with Flowise/no-code	FlowiseAI
4	Use Cases & Deployment	Understand agent use cases, deploy a simple agent	LangChain Use Cases
5	Python for AI Agents	Python fundamentals	Kaggle Python
6	LangChain Basics	Basic LangChain workflow	LangChain Docs
7	Prompt Engineering	Basics and best practices	OpenPrompt
8	Retrieval Augmented Generation (RAG)	RAG introduction	LangChain RAG Docs
9	Agentic Architectures	Learn standard agentic design patterns	LangChain Agents
10	Build Agent from Scratch	Build a minimal agent using open-source LLM	LangChain Cookbook

Day	Topic	Learning Objective/Project	Open Source Resource
11	ReAct Agents with LangChain	Introduction to ReAct pattern	Microsoft Prompt Engineering Guide
12	Multi-user Conversational Agent	Make ReAct agent handle conversations	LangChain Agents
13	LangGraph Basics	Setup and simple agent exercise	LangGraph Docs
14	CrewAI & AutoGen Basics	Install and simple demo	CrewAI , Autogen
15	Build Agent with LangGraph	Project: agent with workflow	LangGraph Examples
16	Build Agent with CrewAI	Project: CrewAI agent	CrewAI Examples
17	Build Agent with Autogen	Project: Autogen agent	Autogen Examples
18	Advanced Workflows	Chaining agents, branching logic	LangGraph Advanced
19	Reflection & Correction	Add error-handling/self-reflection	Autogen corrective workflows
20	Agentic RAG System	Integrate RAG pipeline in agent	LangGraph RAG Example
21	Multi-Agent Collaboration	Agents coordinate for problem-solving	Autogen multi-agent
22	Practical Case Study 1	Automate document Q&A	LangChain Tutorials
23	Practical Case Study 2	Data analysis workflow agent	LangChain Data Analysis
24	Practical Case Study 3	Project: multi-agent review & feedback	CrewAI Examples
25	Capstone Planning	Design a real-world agentic system	-

Day	Topic	Learning Objective/Project	Open Source Resource
26	Capstone (Build 1)	Start capstone build	-
27	Capstone (Build 2)	Continue capstone build	-
28	Capstone (Test & Debug)	Testing, debugging, documentation	-
29	Capstone (Polish & Present)	Polish, writeup, present/demo	-
30	Review & Reflect	Lessons learned, share project	-
